
APS Payroll

Step-by-Step Task Guide

A beginner-friendly walkthrough of running RedTeam's payroll in APS — from the shared payroll-exceptions tracker through time-card approval, the pay-batch wizard, and the final submission and audit.

Source: "APS Payroll Overview" recording & its Google Meet transcript

Recorded: July 17, 2026, 12:56 PM MDT (approx. 58 minutes)

Presented by: RedTeam Human Resources (Susie), with Greg Coble and Connor Schone

System: APS — the payroll system (*APS OnLine*, appspayrollonline.com); company *RedTeam Software, LLC*, semi-monthly pay schedule

How this guide was built. Steps, screenshots, and on-screen values were read from the recording's video frames, and the spoken content is quoted from the meeting's official **Google Meet transcript** — so the "From the meeting transcript" quotes throughout are **verbatim** (lightly trimmed for filler words), each tagged with its speaker and timestamp.

What APS is. APS is RedTeam's payroll system, used at **APS OnLine** (appspayrollonline.com). This guide covers the end-to-end payroll run for **RedTeam Software, LLC** on its semi-monthly schedule.

The payroll process at a glance

Schedule, roles, and the flow from tracker to submitted payroll

Payroll begins outside APS, in a shared **Payroll Exceptions** tracker where every change for the period is logged. From there the work moves into **APS**: approve time cards, run a guided pay batch (select earnings/deductions, enter time, load default hours), then submit and run a payroll summary audit. Two people share the work: **Susie (HR)** records starts, stops, severance, benefits, address changes, and moves new hires into APS; **Greg** adds bonuses/commissions and PTO and reconciles hours against the Red Zone.

Key schedule facts. Paydays are the **1st** and the **15th**. Payroll must be **submitted two days in advance** and is due by **3:00 PM Central** on submission day. If a payday lands on a weekend/holiday, it moves to the preceding business day (e.g., a Sunday payday pays Friday, so you submit Wednesday). The **15th** payroll covers the **1st–15th**; the **1st** payroll covers the **16th–end of month**. You may start a batch the evening before, as long as all inputs are approved.

The nine steps in this guide:

- 1 Keep the Payroll Exceptions sheet up to date.
- 2 Log in to APS and get oriented.
- 3 Approve time cards (and reconcile PTO against the Red Zone).
- 4 Review or edit an individual time card.
- 5 Create / resume the pay batch and enter batch details.
- 6 Select earnings & deductions.
- 7 Enter time, load default hours, and apply exceptions.
- 8 Review the batch and submit.
- 9 Run the payroll summary audit and reports.

The steps

System: APS OnLine • appspayrollonline.com

Step 1 — Keep the Payroll Exceptions sheet current

The **RedTeam Payroll Exceptions** Google Sheet is the shared record of everything unusual for a pay period. The work is split: **Susie (HR)** adds starts and stops, severance, benefits, raises, promotions, and payroll address changes, and moves prospective hires into APS. **Greg** adds **bonuses/commissions** and **PTO**, pulling PTO from approved time and reconciling APS against the internal **Red Zone** site. Everything for the period should be on this sheet before you run payroll, and it's what you reconcile against afterward.

- 1 Open the **RedTeam Payroll Exceptions** Google Sheet.
- 2 Confirm HR's entries (starts/stops, severance, benefits, address changes).
- 3 Add bonuses/commissions and PTO for the period, with amounts and notes.
- 4 Note supporting documentation (e.g., a signed form in the employee's APS profile).

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:02:14

"[Susie] typically adds all the things related to start, stop, severance, benefits, maybe a payroll address change... raises, promotions. And the things that I'm adding are the bonus commissions and then PTO."

Who does what. Susie (HR) owns employee/status changes and new-hire setup in APS; Greg owns bonuses, commissions, and PTO. Coordinate so nothing is entered twice or missed.

The RedTeam Payroll Exceptions sheet — the shared record of every change for the period.

Step 2 — Log in to APS and get oriented

Sign in to **APS OnLine** (appspayrollonline.com). The top navigation has **Employee, Payroll, HR, Attendance, Reporting, and Admin**. The user/company shows in the top-right (e.g. *GREG COBLE — RED TEAM SOFTWARE LLC*). Time-card work lives under **Attendance**, the pay run under **Payroll**, and reports under **Reporting**.

- 1 Go to appspayrollonline.com and sign in.
- 2 Confirm you're in the **RED TEAM SOFTWARE LLC** company (top-right).
- 3 Note the nav: **Attendance** (time cards), **Payroll** (run a batch), **Reporting** (reports).

The APS OnLine main menu and top navigation.

Step 3 — Approve time cards and reconcile PTO

Under **Attendance** → **Approve Time Cards**, APS shows how many cards are **Unapproved**, **Approved**, and how many employees have **no time**. Review each employee's Regular / Overtime / Double-time / Additional / Total hours. Greg reconciles APS against the **Red Zone** calendar so PTO and holidays line up before payroll.

- 1 Open **Attendance** → **Approve Time Cards**.
- 2 Check the Unapproved / Approved / No-time counts.
- 3 Compare PTO/holiday entries against the Red Zone calendar.
- 4 Approve the correct cards.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:02:14

"I'm approving the time cards and I'm looking at the Red Zone, just making sure that we're reconciling between APS and our internal website that we share with employees."

PTO is tracked in hours. RedTeam has unlimited PTO, but hours are still tracked (total, holiday, PTO, and bereavement buckets) because 401(k) and benefit eligibility depend on accurate hour counts.

File Download

Download file successfully created.

To initiate download right click the link below and select the "Save Target As..." option.

Once the "Save As" control appears browse to the appropriate folder, type in a descriptive file name, and click the "Save" button.

Note: When renaming the file be careful to not change the file extension. Changing the extension could cause problems opening the file.

Right click [here](#) to start download.

Approve Checked Times

Displaying 1 - 12 of 12

Version: 2026.07.16

Approve Time Cards — review counts and hours, reconciling against the Red Zone.

Step 4 — Review or edit an individual time card

To inspect or fix one employee, open their card in **Edit Time Cards**. APS shows a weekly grid with hours by type and a running total. If someone worked despite approved time off (or the reverse), edit the card here before approving it.

- 1 Open **Edit Time Cards** and pick the employee.
- 2 Review the day-by-day hours for the pay period.
- 3 Correct any hours (e.g., worked-through PTO), then **Approve Time**.

Reports that help. Under **Reporting** → **Report Manager**, the **Time Card Detail**, **Time Off Request History**, and **Scheduled Time Off** reports help verify hours. In the Report Builder, include hire/term/rehire dates so long-departed employees are filtered out.

Editing one employee's weekly time card in APS.

Step 5 — Create or resume the pay batch (Enter Batch Details)

Go to **Payroll** and start a pay-cycle batch. APS uses a five-step wizard: **1. Enter Batch Details** → **2. Select Earnings and Deductions** → **3. Confirm Batch Details** → **4. Time Entry** → **5. Batch Report**. Set the **Check Date** for the correct half of the month, choose **Employee Type(s)** ("Both Salary & Hourly" is recommended), set **Payroll Run Type** = **Scheduled**, and select the **Semi-Monthly** pay group. **Important:** if you already started a batch and got interrupted, choose **Edit Payroll Batch** — do *not* create a second one. Watch for **Batch Warnings** like "employee updates awaiting approval."

- 1 Go to **Payroll**; choose **Create Payroll Batch** (or **Edit Payroll Batch** to resume).
- 2 Set the **Check Date** for this pay period.
- 3 Choose **Employee Type(s)** = Both Salary & Hourly; **Run Type** = Scheduled.
- 4 Select the **Semi-Monthly** pay group and confirm the period dates.
- 5 Resolve or note any **Batch Warnings**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:45:35

“Because you’ve already created the batch, you don’t need to create another one. You just go to edit payroll batch right here, and it takes you back to exactly where you left off.”

“Pending” items are normal. Some employees show as pending when a benefit election or 401(k) eligibility hasn’t reached its effective date yet (e.g., Aug 1 or 15). New-hire 401(k) enrollment flows in electronically from Lincoln.

Step 1 of the APS pay-batch wizard — Enter Batch Details (with a pending-approval warning).

Step 6 — Select earnings & deductions

On step 2, select every earnings and deduction category this batch will use — for example regular hours, unlimited PTO hours, holiday hours, severance, and bonuses. Skip categories that don’t apply this run (e.g., commissions if they were already paid on the 15th). You can come back and add categories at any point in the batch.

- 1 On step 2, select the categories you’ll use (regular, PTO, holiday, severance, bonuses as needed).
- 2 Leave out anything already paid (e.g., commissions on a 1st-of-month run).

3 Continue to **Confirm Batch Details**, then **Time Entry**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:33:56

"I'm going to select all the categories that we're going to use on this payroll... If between now and then you need to come back and add any of these earnings and deduction selections at any time, you can do that."

aps Employee Payroll HR Attendance Reporting Admin Search GREG COBLE RED TEAM SOFTWARE LLC

Edit Batch Back to Payroll

1. Enter Batch Details 2. **Select Earnings and Deductions** 3. Confirm Batch Details 4. Time Entry 5. Batch Report

Select one or more Earnings or Deductions, then either drag and drop or use the arrows to add or remove them from the payroll batch. Drag the Selected Earnings and Deductions to order them as you would like them to appear in the payroll batch.

Available Incomes

Description +	Income Type	Column Name
Holiday	Hour	HolHr

Incentive New Hire	Dollar	InctNH\$	1

Selected Deductions

Description	Deduction Type	Column Name
-------------	----------------	-------------

Batch Utilities Save Earnings and Deductions as Defaults

Version: 2026.07.1

Step 2 — selecting the earnings and deductions to include in the batch.

Step 7 — Enter time, load default hours, and apply exceptions

On step 4 (**Time Entry**), key in this period's exceptions from your sheet — PTO hours, holiday hours, bonuses — per employee, then click **Load Default Hours** to populate everyone's regular hours at once. APS asks whether to **reduce** default hours by time already entered. Reduce by **holiday** hours (a non-working day), but do **not** reduce by **PTO** so total-hour metrics stay accurate. Check that every total ties out and each entry is on the right person's line.

- 1 Enter PTO, holiday, and bonus hours per employee from the exceptions sheet.
- 2 Click **Load Default Hours** to fill regular hours for everyone.
- 3 When prompted, **reduce** by holiday hours; do **not** reduce by PTO.
- 4 Verify totals tie out and entries are on the correct lines.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:48:03

"You'll also want to load default hours, which is going to populate the regular hours... it's going to give you a message: do you want to reduce the default hours by the time that's already entered, whether it's PTO or holiday?"

Leave, severance & sign-on bonuses. For an employee on leave (e.g., maternity), open the row, click the three dots → **Rate and Salary**, set the override to **0**, and zero out their benefit deductions. Process **severance** by overriding salary with the severance category, and add a new-hire **sign-on bonus** under the **Incentive – New Hire** earnings category.

Employee	Department	Salary	Rate	Sever\$	RegHr	UnlPTO
ALLEGREZZA, KAITLYN (100788)	1503 - CX Success		---	4166.67		
BROWN, COURTNEY (100786)	1503 - CX Success	\$3416.67	---			
CACKIN, KELLY N. (100804)	1301 - Sales and Marketing Mark...	\$7083.34	---			
CARTMILL, TAYLOR L. (100755)	1504 - CX Support		---			
CLARK, CHRISTOPHER (100781)	1402 - Product Product Develop...	\$8114.59	---			
COBLE, GREG A. (00015)	1202 - G&A Operations	\$6095.84	---			
DUNLOP, TAYLOR A. (100797)	1501 - CX Implementation	\$3187.50	---			
EWASHKO, EILEEN M. (11253)	1501 - CX Implementation	\$3003.00	---			

Step 4 — Time Entry: enter exceptions, then Load Default Hours.

Step 8 — Review the batch and submit

Step 5 is the **Batch Report**, with a **Batch Income Summary** and **Deductions Summary**. **View Batch Details** shows a lot but not every calculation, so Greg's routine is to review the summary, then **Submit Batch** to finalize it. Remember the deadline: submitted by **3:00 PM Central**, two days before payday.

- 1 Open step 5, the **Batch Report**; review the income & deduction summaries.
- 2 Optionally open **View Batch Details** for a closer look.

- Click **Submit Batch** to finalize — by 3:00 PM Central, two days before payday.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:55:10

“Once you get everything entered... you'll go to batch report... typically I just go to submit batch, it'll actually submit the batch such that it's ready. And then... you go to reporting, report manager, and then payroll summary audit.”

Beat the deadline. Payroll is due by **3:00 PM Central** on submission day. To avoid pressure, you can start the batch the evening before, as long as all inputs are approved.

aps Employee Payroll HR Attendance Reporting Admin Search GREG COBLE RED TEAM SOFTWARE LLC

Edit Batch Back to Payroll

1. Enter Batch Details 2. Select Earnings and Deductions 3. Confirm Batch Details 4. Time Entry 5. Batch Report

Please verify all information on this report before submitting this payroll. If changes need to be made, return to the Time Entry page to make the necessary changes.
Click the "View Batch Details" button at the bottom of your screen for more information.

Check Date 07-31-2026

Print Page Submit Batch View Batch Details

Version: 2026.07.1

Step 5 — the Batch Report; review, then Submit Batch.

Step 9 — Run the payroll summary audit and reports

After submitting, go to **Reporting** → **Report Manager** → **Payroll** → **Payroll Summary Audit** to review the finished run. Reconcile it against the Payroll Exceptions sheet and the prior period so nothing was missed. The Reporting area also holds the payroll register, GL, and time reports you'll use month to month.

- Open **Reporting** → **Report Manager**.

- 2 Run the **Payroll Summary Audit** (under Payroll) for the batch.
- 3 Reconcile against the exceptions sheet and the prior payroll.
- 4 Export any payroll/GL reports needed for the close.

The APS Reporting area — run the Payroll Summary Audit and payroll/GL reports.

Quick reference

Schedule, the pay-batch wizard, and key rules

Schedule & deadlines

- **Paydays:** the 1st and the 15th (semi-monthly).
- **Coverage:** the 15th pays the 1st–15th; the 1st pays the 16th–end of month.
- **Submit:** two days before payday, by **3:00 PM Central**.
- **Weekend/holiday payday:** move to the preceding business day (Sunday → Friday, submit Wednesday).
- **Commissions:** paid on the 15th for the prior month (July pays June).
- **Bonuses:** Sales monthly, Marketing quarterly, Product & G&A annually.
- **New-hire commissions:** 100% guarantee for the first three months.

The APS pay-batch wizard (5 steps)

Step	Screen	What you do
1	Enter Batch Details	Check date, employee types, Scheduled, Semi-Monthly pay group (or Edit to resume)
2	Select Earnings and Deductions	Pick regular, PTO, holiday, severance, bonuses as needed
3	Confirm Batch Details	Confirm and compile the batch
4	Time Entry	Enter exceptions; Load Default Hours (reduce holiday, not PTO); leave/severance overrides
5	Batch Report	Review summaries, then Submit Batch by 3:00 PM Central

Glossary

- **APS / APS OnLine** — RedTeam's payroll system at appspayrollonline.com.
- **Payroll Exceptions sheet** — shared Google Sheet of starts/stops, raises, bonuses, commissions, and PTO to enter into APS.
- **Red Zone** — RedTeam's internal site/calendar used to track and reconcile PTO against APS.
- **Edit Payroll Batch** — resume an in-progress batch instead of creating a duplicate.
- **Load Default Hours** — fills every employee's regular hours in Time Entry.
- **Payroll Summary Audit** — the Report Manager report used to review a finished batch.
- **Lincoln** — the 401(k) provider that exchanges enrollment data electronically with APS.

About the quotes. The green "From the meeting transcript" quotes are verbatim from the meeting's official Google Meet transcript (lightly trimmed for filler words), each tagged with its speaker and timestamp.

Part 2 — Follow-up

Recorded July 21, 2026 (with RedTeam HR) — continues the pay run: exceptions, review & submission, and posting to QuickBooks

This follow-up picks up inside the pay batch and carries it through to the general ledger. It covers configuring the batch, handling exceptions and prorated pay, reviewing with the Payroll Summary Audit, the two-stage submission, exporting the GL, and uploading the journal entries into QuickBooks. Step numbers continue from Part 1 (which ended at Step 9).

Step 10 — Configure the batch and organize earnings & deductions

Open the batch you started and set the **Check Date**, **schedule**, and **payroll run**. On **Select Earnings and Deductions**, drag and drop the items this period needs (add others like expense reimbursements, holiday, or bereavement if applicable). A handy convention: put the **salary-impacting** items up top and the **hours** items in the right/last part of the section — it just keeps things easy to track. **Confirm Batch Details** is a simple click-through.

- 1 Edit the batch; set Check Date, schedule, and payroll run.
- 2 Drag salary-impacting earnings/deductions up top; put hours items in the right section.
- 3 Click through **Confirm Batch Details**, then go to **Time Entry**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:03:10

“Typically what I’ll do is I’ll put the ones that are salary impacting up front... and then I’ll put the hours in the right part of the section... The next thing you would do is go to confirm batch details, and this is just a click-through.”

Batch Utilities Save Earnings and Deductions as Defaults

Version: 2026.07.20a

APS — Select Earnings and Deductions (drag items into the batch).

Step 11 — Handle exceptions and prorate pay

In **Time Entry**, adjust for the period's exceptions from the Payroll Exceptions sheet. For an employee on leave or with **severance**, zero out their normal rate and their benefit deductions (an alternative for scheduled deductions is to update the **benefit end date** in the employee list). For **prorated** or **holiday** pay, compute an hourly rate from the semi-monthly salary using a **2,080-hour** year, then multiply by the actual hours/days worked (check a calendar for the real workdays). The system auto-calculates some mid-period starts — verify those — but for holiday pay it usually can't, so calculate it yourself. 401(k) may still apply if the employee is eligible that period.

- 1 Enter each exception (severance, holiday, PTO, bonuses) against the right employee.
- 2 For leave/severance: zero the rate and benefit deductions (or set the benefit end date).
- 3 Prorate: hourly rate = annual salary ÷ 2,080, then × the actual hours worked.
- 4 Verify system-calculated mid-period starts; calculate holiday pay manually.
- 5 Keep backup documentation for every commission/bonus entry.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:07:06

"I put in the semi-monthly amount and then I break it down to an hourly rate... based off of the number of hours in the year, 2080... and then the hours that she actually worked... that calculates the amount she's paid."

Back everything up. Every payroll entry (commissions, bonuses, adjustments) must be supported by backup documentation from the relevant department.

The screenshot displays the APS Payroll system interface. On the left, the 'Edit Batch' screen shows a table with columns for employee name, rate, hours, and pay. The right side shows a summary report with columns for employee name, department, salary, rate, and total pay. A video call window is visible in the bottom right corner.

Zeroing a rate / overriding deductions for an exception in APS.

Step 12 — Review with the Payroll Summary Audit, then submit

Skip **View Batch Details** — it omits taxes. Instead click **Submit Batch** (this is *not* the final submission; it just unlocks reporting), then go to **Reporting** → **Report Manager** → **Payroll** → **Payroll Summary Audit**. Run it for the period with **include employer tax** and grouped by employee base department. This report has everything — hours, both sides of benefits, both sides of taxes, and the totals that tell you the cash outlay. Download it as a **PDF**, save a copy of the **exceptions log**, and send both to Craig and Susie for review. Once they confirm, come back and click **Submit Batch** → **Final Submission** (choose **Edit** if changes are needed first).

- 1 Click **Submit Batch** to enable reporting (not final yet).

- 2 Run **Report Manager** → **Payroll** → **Payroll Summary Audit** (include employer tax; group by base dept).
- 3 Download the audit PDF + save the exceptions log; send to Craig & Susie to review.
- 4 After sign-off, **Submit Batch** → **Final Submission** to lock the payroll.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:13:31

"When you click submit batch... that's not the final submission — it allows you to come up and run the reports... I would go to payroll summary audit and run it for the period... this report has everything you need... both sides of the benefit contribution and... tax."

Deadlines. Final submission is due by **3:00 PM Central**, and payroll must be submitted **several days ahead** to meet federal deposit requirements (funds are pulled before payday). If a serious error slips through after final submission, call APS — they can undo the batch.

The Batch Report and the Reporting menu — run the Payroll Summary Audit, then submit.

Step 13 — Export the general ledger and prepare it for QuickBooks

After the payroll is submitted, pull the **General Ledger** report from APS and prep it in Excel for QuickBooks Online: **remove the zero rows, consolidate the bank transaction amounts** into the

single bank-activity entry, and make sure the **department codes** are formatted correctly. Reuse the **naming conventions from a previous payroll** so the entry imports cleanly (mismatched names cause errors in QuickBooks).

- 1 Export the **General Ledger** report from APS to Excel.
- 2 Remove zero rows; consolidate bank amounts into one bank-activity line.
- 3 Format the department codes; match account names to a prior payroll exactly.
- 4 Save the cleaned journal-entry file.

Naming conventions matter. Copy account/department names from the previous month's file — exact spelling and formatting are what let the import match existing QuickBooks accounts.

Preparing the exported GL in Excel (right: the APS batch report it ties to).

Step 14 — Upload the journal entries to QuickBooks via SaaSant

Open **SaaSant** (“SAS”) — the tool that bulk-uploads transactions into QuickBooks Online — and sign in. Pick the right company (**RedTeam** or **Paser**), then **Bulk Upload** → **Journal Entries** and **drag and drop** the cleaned file. Click **Continue**; SaaSant assembles the entry and lets you **Review** then **Submit**. If it flags **errors**, stop, fix them in the spreadsheet, and re-upload the revised file. Finally, verify in QuickBooks: **Reports** → **Profit & Loss** (by months) — open a payroll line to confirm the entry posted

correctly, and check the journal name and date.

- 1 Open SaaSant, sign in, and select the company (RedTeam / Paser).
- 2 **Bulk Upload** → **Journal Entries**; drag & drop the file; **Continue**.
- 3 **Review**, resolve any flagged errors in the sheet, and re-upload; then **Submit**.
- 4 Verify in QuickBooks P&L; confirm the journal name and date.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:26:42

“SAS... is a piece of software that allows you to upload transactions into QuickBooks Online... you go to bulk upload, then journal entries, then drag and drop... it may start giving me errors... you can address the errors and it will tell you what the errors are.”

Subscription note. The SaaSant subscription is moving to Connor's own account; use it primarily for payroll journal uploads.

SaaSant — bulk-uploading the payroll journal entry into QuickBooks Online.

Step 15 — Administration & maintenance

A few standing admin items. APS handles tax setup and updates, so you rarely touch tax settings; when a new tax jurisdiction or benefit category needs approval, the request now routes to **you** as an

admin. Use the **Doc Vault** for tax reports and W-2s, the **Report Builder** for custom extracts, and save **favorite reports** to speed up your workflow. For **manager changes** (e.g. Taylor returning), remove the old manager's access, make the person a manager, and reassign the departments, security type, and employee groups. Maintain employee groups manually; **terminated employees stay on the list until their final severance is paid**, then are removed.

- 1 Approvals for new tax jurisdictions / benefits now come to you (admin).
- 2 Find tax reports & W-2s in the **Doc Vault**; build custom reports with **Report Builder**; save favorites.
- 3 Update **manager settings** (access, department, security, employee groups) as roles change.
- 4 Leave terminated employees on the list until final severance clears, then remove them.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:40:26

"I'm a little bit concerned if I start to change things we might not be able to get back to some history... it takes me so little time to make the adjustment, I just do that manually."

Don't change the GL settings in APS. Greg deliberately left APS's General Ledger settings alone so historical payroll data (from the pre-APS system) stays accessible.

APS administration — manager/department settings and employee maintenance.
