
Job Description: Controller

About RedTeam

RedTeam is a leading construction management solution that helps SMB commercial general contractors plan, collaborate, and deliver projects with greater control and confidence. Our all-in-one, SaaS-based platform manages every phase of the construction lifecycle, from pre-construction and project management to field operations and financials.

We are executing Project Northstar: a ground-up rebuild of our platform leveraging the latest in AI technology, informed by 15+ years of serving SMB general contractors. This is not an incremental product update; it is a new build designed to define the next chapter of construction technology for our market. Alongside the product build, we are executing an operating plan that includes a significant organizational restructure. The Controller will play a key role in this transition, building the accounting infrastructure, financial controls, and reporting capabilities that support our Northstar growth goals.

About the Role

The Controller is a critical hire at RedTeam: a hands-on accounting leader who owns the integrity of our financial data and reporting. This role reports to the VP of Finance and will serve as a true partner to the VP, owning the full accounting function, including monthly close, revenue recognition, bank reconciliations, and audit management, while collaborating closely on reporting, analysis, and financial strategy.

This is not a supervisory-only role: we need someone who lives in QuickBooks Online, personally executes the close, and can get into the detail on every transaction. The right candidate has closed the books at a SaaS company, managed deferred revenue schedules, led an annual audit, and thrives when precision and speed both matter.

As RedTeam scales to the ARR milestones defined in our Northstar plan, this role will grow in scope, team size, and strategic influence within the finance organization.

What You'll Do

Accounting Operations & Monthly Close

- Monthly & Quarterly Close: Own and execute the full monthly and quarterly close process: preparing journal entries, reconciling accounts, and delivering accurate financial statements

on a consistent close calendar, with a target of closing the books within 5 business days of month-end.

- Bank Reconciliations: Perform bank reconciliations across all accounts, investigating and resolving discrepancies promptly.
- QuickBooks Online Administration: Serve as the primary administrator and power user of QuickBooks Online: maintaining the chart of accounts, managing integrations, and ensuring data integrity across the platform.

Revenue Recognition & Financial Reporting

- ASC 606 Revenue Recognition: Own the end-to-end revenue recognition process under ASC 606, including contract review, allocation of transaction prices, and determination of performance obligations for SaaS subscription and services revenue.
- Deferred Revenue Management: Maintain and reconcile deferred revenue schedules, ensuring accurate revenue deferrals and releases aligned with contract terms and ASC 606 guidance.
- Financial Reporting: Prepare monthly financial statements, variance analysis, and supporting schedules for VP of Finance review. Ensure GAAP compliance across all reporting.
- Equity & Stock-Based Compensation: Record and maintain stock-based compensation expense under ASC 718, including option and equity grant tracking and related financial statement disclosures.
- Accounts Payable & Accounts Receivable: Oversee AP/AR processes, including invoice processing, collections, and vendor payment cycles.

Audit, Tax & Compliance

- Annual Audit: Lead preparation for and manage the annual external audit: coordinating with auditors, preparing schedules and workpapers, and driving timely resolution of audit requests.
- Tax Compliance: Coordinate with external tax advisors on federal and state income tax filings, sales tax compliance, and 1099 reporting.
- Internal Controls: Develop and maintain internal controls over financial reporting, ensuring appropriate segregation of duties and documentation.
- Payroll Oversight: Partner with HR on payroll processing, ensuring accurate recording of compensation, benefits, and payroll tax liabilities.

Systems & Process Improvement

- QuickBooks Online Optimization: Continuously improve QBO workflows, reporting templates, and system integrations to increase close speed and reporting accuracy.
- Process Documentation: Build and maintain accounting policies, procedures, and process documentation to support a scalable finance function.
- AI & Automation: Leverage AI tools and automation to streamline reconciliations, data entry, and routine accounting tasks.

What We're Looking For

- 5–10+ years of progressive accounting experience, with at least 2 years owning the full close cycle at a B2B SaaS company.
- Deep, hands-on QuickBooks Online expertise: you are the power user, not someone who delegates to a bookkeeper.
- Strong working knowledge of ASC 606 revenue recognition, including deferred revenue, performance obligations, and contract modifications.
- Demonstrated experience closing the monthly books end-to-end and producing GAAP-compliant financial statements.
- Experience preparing for and managing an annual external audit, including workpaper preparation and auditor coordination.
- Proficiency in bank reconciliations and general ledger maintenance with strong attention to detail.
- CPA preferred; active CPA strongly valued.
- SaaS metrics familiarity (ARR, deferred revenue, churn) and experience in a subscription-revenue environment.
- Construction software, project management, or vertical SaaS industry background is a plus.
- Self-starter who thrives in a lean, fast-paced environment with a startup mindset.
- Location: Remote, though Austin, TX preferred.

Nice to Have

- Payroll processing and administration experience.
- Sales tax compliance and multi-state nexus experience.
- SaaS billings operations and subscription billing platform experience.
- Corporate card program administration and expense management experience.
- HubSpot experience.

Why RedTeam

- Opportunity to shape the future of an established, growing SaaS platform with strong market traction.
- A key role in a lean, high-impact finance team, working directly with the VP of Finance and executive leadership.
- Real equity upside and room to grow into an expanded leadership role, in a business at an inflection point, executing a well-funded growth strategy.
- Collaborative, mission-driven culture built around transparency, innovation, and customer success.
- Competitive compensation with salary, annual bonus, equity, and a comprehensive benefits package.
