
Vendor Payments & Cash Receipts

Step-by-Step Task Guide

A beginner-friendly walkthrough of RedTeam's weekly money movement — applying incoming client check deposits in QuickBooks Online, matching them on the bank, and then paying vendors by bill pay, ACH, and domestic or foreign wire, with Craig's approval on everything that leaves the account.

Source: "Vendor Payments/Management Overview" recording + its Google Meet transcript

Recorded: July 21, 2026, 10:00 AM MDT (approx. 57 minutes)

Presenter / trainer: Greg Coble • **Trainee:** Connor Schone

Systems: QuickBooks Online (RedTeam Software, Paser), One Florida Bank treasury portal, CorePay (FX wires), Google Drive (bank deposit log & AP folder), VIP authorization app

How this guide was built. Steps, screenshots, and on-screen values were read from the recording's video frames, and the green "From the meeting transcript" quotes are **verbatim** from the meeting's Google Meet transcript (lightly trimmed for filler words), tagged with speaker and timestamp.

Two more sessions are planned. A dedicated **Wise** walkthrough and a final "where does each file/folder live" screen-share were scheduled for later in the week, so those are noted here rather than shown in full.

The big picture

Money in on any day, money out every Friday — and Craig approves everything out

There are two halves to this job. **Cash receipts:** client checks are deposited remotely by **Susie** in the Orlando office, logged in a shared **bank deposit log**, and you apply each one to the right customer invoice in QuickBooks Online, then **match** it on the bank. **Vendor payments:** once a week you review what's due, send Craig the list to approve, and pay each bill by **business bill pay** (check), **ACH**, or **wire** (domestic or FX). The same books cover two entities — **RedTeam Software** and **Paser** — and the process is identical for both.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:54:39

"Typically I'm doing this on a Friday morning. Every Friday is our vendor payments. And I only pay what we need to pay for that particular period of time."

The golden control. Craig must **approve every ACH and wire** before it goes out, and you must **mark each payment as paid in QuickBooks** the moment you make it — otherwise the bill still looks open and could be paid twice.

Part I — Record incoming client payments

Apply each deposit to the right invoice, then match it on the bank

Step 1 — Start from the bank deposit log

Physical client checks are mailed to the Orlando office, where **Susie** deposits them remotely from her phone and records them in the shared **Bank Deposit Log – Live Checks** in Google Drive (separate tabs for **RedTeam Software** and **Paser**). When the bank — or Susie — notifies you of a remote deposit, open the log and find the matching batch; the total there (e.g. the **\$15,865.71** group) should equal the deposit shown on the **One Florida Bank Checking** account in QuickBooks.

- 1 Watch for the bank's remote-deposit alert or Susie's note.
- 2 Open the **Bank Deposit Log** and go to the correct entity tab (RTS or Paser).
- 3 Confirm the deposit-log total matches the deposit in QuickBooks Online.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:01:33

"The checks go to the Orlando office address and Susie receives those checks and she does remote deposits with her phone."

The image displays two side-by-side screenshots from a computer screen. The left screenshot shows a Google Sheet titled "Bank Deposit Log - Live Checks". It contains a table with columns for date, check number, payee, and amounts. The data is organized by date, with entries for May 2024 and June 2024. The right screenshot shows the QuickBooks Online interface for "One Florida Bank Checking". It displays a summary of the bank account balance, showing a current balance of \$281,086.13 and a previous balance of \$18,769.89. Below the summary, there is a table of transactions with columns for date, bank description, spent, received, and balance. The transactions are listed for the month of May 2024. In the bottom right corner of the QuickBooks interface, there is a video call window showing two participants: Greg Coburn and another person.

The Bank Deposit Log (left) alongside the One Florida Bank Checking register in QuickBooks Online (right).

Step 2 — Apply the payment to the correct invoice

In QuickBooks Online go to **Customers**, open the paying customer, and choose **Receive payment**. Set the **payment date to the deposit date**, set the method to **Check**, and enter the **check / reference number** from the log. Verify the amount matches the log exactly and that it is landing on the intended invoice — the amount field sometimes auto-populates from a stray credit below.

- 1 **Customers** → open the customer → **Receive payment**.
- 2 Set the **date = deposit date**; method = **Check**; enter the check number.
- 3 Confirm the amount ties to the log and the correct invoice is checked; **Record and close**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:03:46

"I always change the date to the deposit date... it helps me just kind of keep things straight."

Don't let stray credits apply. If credits show up under Outstanding Transactions and try to attach, **uncheck** them so only the payment being deposited is applied — you want the deposit to match exactly.

The screenshot displays the QuickBooks Online interface. On the left, the 'Bank Deposit Log - Live Checks' window is open, showing a table of transactions. The table has columns for Date, Description, Debit, and Credit. The total amount is \$1,011.96. On the right, the 'Receive Payment' screen is open for the customer 'Conductor Construction Management'. The 'Record or charge' section shows 'Record payment' selected, with 'Payment Date' set to 07/20/2024 and 'Reference no.' set to 14764/123. The 'Amount' field is set to \$1,011.96. The 'Outstanding Transactions' section shows a list of invoices, with the first invoice (Invoice # 14764/123) selected. The 'Amount to Apply' is \$1,011.96. A video call window is visible in the bottom right corner, showing two participants: Greg Coble and another person.

Receiving a check payment against a customer invoice, with the date set to the deposit date.

Step 3 — No remittance advice? Apply to the oldest invoice

Some payments arrive without any indication of which invoice they cover. When that happens, apply the payment to the customer's **oldest outstanding invoice**. Doing this keeps our records aligned with the client's so that open-invoice conversations and statements match one-to-one.

- 1 When there's no remittance advice, select the **oldest open invoice**.
- 2 Enter the check number and amount; keep unapplied credits unchecked.
- 3 **Record and close** so the client and internal records stay aligned.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:07:14

"There's no remittance advice as far as what invoice that applies to. So when that happens, I'll typically just go to the oldest outstanding invoice."

The screenshot displays the 'Receive Payment' interface in QuickBooks Online. On the left, a list of 'Outstanding Transactions' is visible, including invoices from various construction and service companies. The right side shows the 'Record or charge' section with a payment amount of \$10,298.75. The 'Payment method' is set to 'Check', and the 'Deposit to' account is 'One Florida Bank Checking'. The 'Record payment' checkbox is checked. Below this, the 'Outstanding Transactions' table is shown, with the oldest invoice (Invoice # 14765/01) selected. The 'Credits' section is also visible, showing unapplied payments. A video call window in the bottom right corner shows two participants, Greg Coble and another person.

DATE	DESCRIPTION	ORIGINAL AMOUNT	OPEN BALANCE	PAYMENT
11/11/2023	Invoice # 14765/02	\$0.00	\$0.00	
07/10/2024	Invoice # 14765/01	\$10,298.75	\$10,298.75	\$10,298.75

DATE	DESCRIPTION	ORIGINAL AMOUNT
07/10/2023	Unapplied payment # 1071	\$2,785.75

The Receive Payment screen showing a customer's outstanding transactions to choose from.

Step 4 — Match the deposit on the bank feed

After the individual payments are recorded, go to **Bank transactions**, find the remote deposit, and click **Match**. Filter by **Receive payments** and select the payments you just applied (use the deposit date and check numbers to line them up). The **difference must be zero** before you confirm the match.

- 1 Open **Bank transactions** and select the remote deposit; click **Match**.
- 2 Set record type to **Receive payments** and tick the payments you applied.
- 3 Confirm the **difference is 0.00**, then **Match**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:10:54

"Then you want to make sure that your difference is zero here."

Unexpected credits (e.g. an IRS refund). If a deposit isn't a client payment — Greg's example was a small **IRS refund on the 940** — add a line coded to the right expense category (**Payroll taxes & benefits**), give it a class (e.g. **Operations**), enter the amount so it ties to zero, and write a clear memo.

The screenshot displays the QuickBooks Online interface. On the left, the 'Bank Deposit Log - Live Checks' window is open, showing a list of transactions. The total deposit amount is \$55,491.65. On the right, the 'Transaction List' window is open, showing a list of transactions. The total amount is \$55,491.65. A video call window in the bottom right corner shows Greg Coble and another participant.

DATE	TYPE	NO.	CUSTOMER/PRODUCT	AMOUNT	STATUS	ACTION
7/25/26	Invoice	147501-00	The Neighborhood Construction Company	\$1,000.00	Due in 4 days	View/Edit, Renewal payment
1/22/26	Payment	4049	The Neighborhood Construction Company	\$1,000.00	Closed	View/Edit, Print
6/25/26	Invoice	147549-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print

2/25/26	Invoice	147419-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print
1/25/26	Payment	147419-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print
1/25/26	Payment	4065	The Neighborhood Construction Company	\$1,000.00	Closed	View/Edit, Print
1/25/26	Payment	4157	The Neighborhood Construction Company	\$1,000.00	Closed	View/Edit, Print
1/25/26	Invoice	14729-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print
1/15/26	Invoice	3985	The Neighborhood Construction Company	\$1,000.00	Closed	View/Edit, Print
6/25/26	Invoice	147205-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print
6/25/26	Payment	2761	The Neighborhood Construction Company	\$1,000.00	Closed	View/Edit, Print
6/25/26	Invoice	147219-00	The Neighborhood Construction Company	\$1,000.00	Paid	View/Edit, Print

Matching the remote deposit on the bank feed to the payments recorded in QuickBooks.

Part II — Before you pay: spot missing entries

The balance sheet and the P&L are your error detectors

Step 5 — Use the financials to catch what you missed

Connor asked how QuickBooks flags a missed step. The answer: it won't pop a warning — the **financials themselves** are the indicator. If the **balance sheet doesn't tie back to your reconciliations**, or you see variances you can't explain, you're likely missing a journal entry or a close step. Run the **Profit & Loss by month** and look across the row: a line that drops sharply (Greg's example — product-development payroll falling from ~\$188K to ~\$86K) usually means a **missing payroll journal entry**.

- 1 Reconcile first, then review the **balance sheet** against each reconciliation.
- 2 Run the **P&L by month**; scan each row for a sudden drop.
- 3 Re-run the P&L **by department (class)** to catch items coded to the wrong class.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:13:05

"If your balance sheet is not tying back to the reconciliation that you do... that's typically going to lead you to the fact that you might be missing a journal entry or a step in the close process."

Related-company charges. Some costs (e.g. shared **AWS** billed under RedTeam Software) must be charged over to **Paser** during close. If that step is skipped, the department column shows blank — a by-class review catches it.

The Profit & Loss run by month — comparing columns is how you spot a missing entry.

Part III — Pay the vendors

Weekly: pick what's due, get Craig's approval, then pay by bill pay / ACH / wire

Step 6 — Review AP aging and confirm every bill is entered

Open the entity's QuickBooks (start with **RedTeam Software**) and run **Standard reports** → **What you owe** → **Accounts Payable Detail (aging)**. Before paying anything, make sure **every vendor bill is entered** and aged correctly — check the **accounting@** inbox for anything that just came in and enter it first. Note any deliberate holds: the **Six Cents** invoice (~\$61,000/yr, a three-year agreement Sales is trying to exit) is intentionally not entered, per Jared.

- 1 Run the **AP Detail aging** report for the entity.
- 2 Enter any new bills from the accounting inbox, then re-run the report.
- 3 Confirm known holds (e.g. Six Cents) and export the report to **Excel**.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:21:27

"You always want to make sure you have everything in here... so that when you're ready to go make the payments, you have all your invoices in here and they're aged accordingly."

The image displays a dual-screen setup. The left screen shows the 'Bank Deposit Log - Live Checks' window in QuickBooks Online, featuring a grid of transactions with columns for date, amount, and payee. A video call window is overlaid on the grid. The right screen shows the 'RedTeam Software' account page, which includes a table of transactions with columns for date, amount, and payee. A video call window is also overlaid on this screen.

The Accounts Payable Detail (aging) report in QuickBooks Online for RedTeam Software.

Step 7 — Build the weekly payment list and email Craig

In the exported Excel report, hide the columns you don't use and move the bills **due this period** to the top (Greg pays for the current week — e.g. everything due between the **24th and 31st**). Watch for **short pays**: if only part of an invoice is authorized, pay just that amount and the open balance carries. Clean up the formatting and paste the list into an email to **Craig** so he knows what you're about to initiate. Add a short note next to any **new or unusual vendor** so Craig knows who it is.

- 1 Format the export; move bills due this period to the top.
- 2 Handle any short pays (pay only the authorized amount).
- 3 Paste the list into an email to Craig; annotate new/unusual vendors.
- 4 Save the file to **Accounting RTS → AP → 2026** (e.g. **72426 vendor payments**).

Preemptive vendor notes. Greg adds a note beside odd-looking names — e.g. “Atlanta Style Writers Association” is really a product-development contractor — so Craig doesn't have to ask.

The AP aging export (left) being prepared into the payment list emailed to Craig for approval (right).

Step 8 — Pay by business bill pay and record the reference in QuickBooks

For a check payment, open **One Florida Bank** and go to **Payments → Business bill pay**. Select the payee, enter the amount, add the **invoice number** and a short description (usually “services”), and save. Nothing is sent until you click **Pay all**, which produces a **reference number**. Immediately go back to the bill in QuickBooks, choose **Mark as paid**, and enter that reference number — this is the safeguard against paying a bill twice. Reference numbers run in sequence (the last few were 440, 445, 463, 480), so the next will be in that range.

- 1 **Payments** → **Business bill pay**; select payee, amount, invoice number, description.
- 2 Click **Pay all** and copy the **reference number**.
- 3 In QuickBooks: open the bill → **Mark as paid** → paste the reference number.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:35:23

"Once you've processed the payment in the bank you process the payment in QBO because otherwise it'll still show as outstanding and you may pay it twice."

The One Florida Bank business bill-pay payee list.

A bill payment being entered (\$15,200) — the reference number goes back into QuickBooks as “Mark as paid.”

Step 9 — Proof of payment when a client asks

If someone says a check hasn't arrived, pull the detail from **Treasury management** → **Business bill pay** → **Payment history**. Search the payee and open the result: you'll see both the **reference number** (e.g. 480) and the actual bank **check number** (e.g. 30349). Because the check number isn't available right away, we record the **reference number** in QuickBooks, not the check number. Screenshot the record as proof, or ask them to allow a few more mail days. Stop-payments are rare — if you need one, call the bank.

- 1 **Treasury management** → **Business bill pay** → **Payment history**; search the payee.
- 2 Open the result to see the reference and check numbers; screenshot as proof.
- 3 For a stop-payment, contact One Florida Bank directly.

Step 10 — Initiate an ACH payment

For ACH, go to **Payments** → **Create an ACH payment**. Choose the company (**RedTeam Software**), put the **invoice number** in the description, and add the recipient. Enter the **routing and account numbers** — for vendors we pay by ACH these are usually saved in QuickBooks (on the bill memo or the attached invoice, look for the **ABA** number). Enter the amount and click **Review**, then confirm using the **VIP authorization app**. The payment then sits **pending** Craig's approval.

- 1 **Payments** → **Create an ACH payment**; select the company and add the recipient.
- 2 Enter routing/account (from the QuickBooks bill/invoice) and the amount; click **Review**.
- 3 Confirm in the **VIP app** (authorization number + last 4 of SSN / PIN).

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:28:24

"We're paying via ACH, he has to approve those before they go out. Same thing with wires or international wires."

Authorization app. Confirming an ACH or wire pops a window; open the **VIP** app, enter the authorization number, then your **PIN** (Greg uses the last four digits of his SSN).

The screenshot displays a dual-screen setup. On the left, a Microsoft Excel spreadsheet titled "RedTeam Software AP Aging Detail Report As of July 21, 2026" is open. It contains a table with columns for Date, Transaction type, Name, Vendor, Date due, and Amount. The table lists several vendors including "Alaska State Systems", "Prestige Staffing LLC", "Prosource Pro Consulting", and "Auto Group". A summary row at the bottom shows a total amount of \$13,677.46. On the right, a web browser window shows the FDIC "Create ACH Payment" interface. The "Manage Recipients" section is active, displaying details for "Prestige Staffing", including the ACH Company Name "RED TEAM SOFTWARE", ACH Company ID "1562056679", SEC Code "CCD", Entry Description "144996", and Effective Date "8/22/2026". The "Create ACH Payment" steps are shown as 1. Create Payment, 2. Manage Recipients, 3. Review, and 4. Confirmation. A video call window is overlaid on the bottom center of the screen, showing two participants: "Corydon Software" and "Greg Coble".

Creating an ACH payment and managing the recipient in the bank portal.

Step 11 — Send for approval, and re-initiate if it expires

Once the ACHs and wires are entered, go to **Payments** → **ACH payment activity**, screenshot the items needing sign-off, and attach them to the same approval email so Craig sees exactly what to approve. When Craig approves, each payment moves from **pending** to **initiated** — you don't need to send it again. If an approval window **expires** (he was travelling, etc.), simply **re-initiate the payment in the bank**. Because you already marked it paid in QuickBooks, no accounting change is needed.

- 1 Screenshot **ACH payment activity** / wires and send to Craig for approval.
- 2 On approval, payments move **pending** → **initiated** automatically.
- 3 If it expired, **re-initiate in the bank**; leave QuickBooks as-is (already marked paid).

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:47:05

"Once he approves them, they go from the pending stage to the initiated stage."

The screenshot displays a dual-screen view. On the left, a Microsoft Excel spreadsheet titled "RedTeam Software A/P Aging Detail Report As of Jul 21, 2026" is open. It contains a table with columns for Date, Transaction type, Name, Vendor, Due date, and Amount. The table lists several vendors including "HMS Cloud Serv...", "CSC", and "Atlanta Style Wh...". The total amount for the report is \$15,677.86. On the right, a web browser shows the "FDIC" portal. The "Payments" section is active, displaying a list of scheduled and processed payments. The "Scheduled to process in the next 30 days" section shows "No transactions are scheduled". The "Processed within the last 30 days" section lists several payments, including "Baker Botts LLP" for \$214.00, "HMS Cloud Serv..." for \$4,500.00, "CSC" for \$612.00, and "Atlanta Style Wh..." for \$15,200.00. A video call window is overlaid on the bottom center of the screen, showing two participants: Greg Coble and another person.

The bank's scheduled / pending payments view used to track approvals.

Step 12 — Foreign (FX) wires via CorePay

International vendors are paid with an **FX wire**, which opens a separate dashboard called **CorePay** (you'll see it in the address bar). Go to **Payments**, pick the beneficiary (e.g. **Tiller Digital**), enter the amount, the **payment reference / invoice**, and the reason (professional services), then **Add payment** and **Notify sender** — that emails Craig. To set up a new beneficiary, add their name, bank and contact details, country, and currency (we almost always pay in **USD** even for foreign vendors, because they invoice in USD).

- 1 **Create an FX wire** → CorePay → **Payments**; select the beneficiary.
- 2 Enter amount, invoice reference, and reason; **Add payment** then **Notify sender**.
- 3 New beneficiary: add bank/contact details, country, currency (default **USD**).

Wire vs. Wise. Most overseas contractors are paid through **Wise** (covered in its own session). A few — e.g. **Lozano Chu** in Peru — must go by bank **wire** because their bank won't accept Wise.

The screenshot displays the CorePay dashboard and a Google Sheet. The dashboard, titled "Your Dashboard", shows "No Messages" under "UPDATES" and "ARCHIVED NEWS". It features a "SPOT TRADE" section with a "You Buy" dropdown, a "You Sell" dropdown, and a "GET QUOTE" button. To the right, there are "ACTION ITEMS" (3 Pending payments) and "REPORTS" (1st of May Report, Payment History, Settlement History, Verification Screening, Today's Payment(s), Deal History, More Payment History, Payments in Progress). Below the dashboard is a "DEALS" table with columns: Request Date, Deal Amount, Deal Reason, Priced Deal Amount, Rate, Source, and Value Date. The Google Sheet, titled "Google Sheet", shows a list of transactions with columns: Transaction ID #, Batch Name #, File Name #, ACN Company Name, SEC Code, Source, Initiated Date, Effective Date, Debit Amount, and Credit Amount. A video call window is visible over the spreadsheet, showing two participants: Connor Schone and Greg Cob...

Transaction ID #	Batch Name #	File Name #	ACN Company Name	SEC Code	Source	Initiated Date	Effective Date	Debit Amount	Credit Amount
ADDC1538441	Event Governance Consulting		RED TEAM SOFTWARE	CCD		07/17/2024	07/20/2024	\$0.00	\$9,979.00
ADDC1538587	Policy & Leadership		RED TEAM SOFTWARE	CCD		07/17/2024	07/20/2024	\$0.00	\$4,525.00

The CorePay dashboard used to initiate foreign-exchange (international) wires.

Quick reference

Payment rails, the weekly rhythm, and the two golden rules

Payment methods

Method	When it's used	Approval / notes
Business bill pay (check)	Most domestic vendors	Can be cancelled before sending; record the reference number in QB
ACH	Vendors set up for ACH	Craig approves; confirm in VIP app; pending &arr; initiated on approval
Domestic wire (USD)	Larger / time-sensitive USD payments	Craig approves; screenshot to Craig
FX wire (CorePay)	International vendors (invoice in USD)	Notify sender emails Craig; default currency USD
Wise	Most overseas contractors	Separate session; some (e.g. Peru) must use a wire instead

The weekly rhythm

- 1 **Any day:** apply client check deposits from the log, then match them on the bank (difference = 0).
- 2 **Friday morning (moving to Thursday):** run AP aging, confirm every bill is entered, export to Excel.
- 3 Build the list of what's due this period; email it to Craig; annotate new vendors.
- 4 Pay by bill pay / ACH / wire; confirm ACH & wires in the VIP app.
- 5 Screenshot ACH & wire items to Craig for approval; re-initiate anything that expires.
- 6 Mark every payment as paid in QuickBooks with its reference number.

Two golden rules

- **Craig approves everything that leaves the account** — every ACH and every wire.
- **Mark it paid in QuickBooks immediately** — a bill left open can be paid twice.

About the quotes. The green "From the meeting transcript" quotes are verbatim from the meeting's official Google Meet transcript (lightly trimmed for filler words).

Part 2 — Follow-up

Recorded July 23, 2026 — cash management, inter-company transfers, funding Wise, and keeping management in the loop

Part 1 covered recording client payments and paying vendors (bill pay, ACH, and FX wires). This follow-up adds the treasury side: managing the cash balance, moving costs and cash between the Paser and RedTeam entities, funding the Wise account for contractor pay, and emailing Craig a summary of what went out. Step numbers continue from Part 1 (which ended at Step 12).

Step 13 — Manage the cash balance before you pay

Before a payment run, look at what's available and what's due. Keep at least a **\$20,000 reserve** in the Paser bank account, and size the run against what's coming — some months are heavier (this one ran ~\$25k of Wise contractor pay vs. a typical ~\$20k because of Q2 incentives and reduction-in-force severance). Greg pays the **smaller, recent invoices first** to keep the AP aging list short and organized.

- 1 Check the bank balance and the AP aging list.
- 2 Keep a $\geq$ \$20,000 reserve in the Paser account.
- 3 Plan for heavier months (quarterly incentives, severance).
- 4 Clear small/recent invoices first to keep AP tidy.

The AP aging list in QuickBooks — what's outstanding, used to plan the run.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:03:34

“The Wise contractor payments are going to run about 25 grand this month... typically they run about \$20,000. They're higher this time because we're paying the Q2 incentive for the support team and severance.”

Step 14 — Transfer inter-company costs & reverse consolidation entries

Some costs (labor, marketing, AWS) are shared and moved between **Paser** and **RedTeam** using the AP aging detail. At **month-end**, as part of the consolidation **elimination**, reverse the journal entries that offset specific invoices so the balance is stated correctly before and after the payment. You'll see the summary reflect those journal entries (e.g. a negative balance) until the offsetting reversal is posted.

- 1 Use AP aging to identify inter-company cost transfers (labor / marketing / AWS).
- 2 At month-end, reverse the JEs that offset the affected invoices (consolidation elimination).
- 3 Confirm the balance is correct before and after the payment.

Why the balance looks off. A negative balance in the summary is usually the pending consolidation journal entries — posting the offsetting reversal brings it back in line.

Step 15 — Wire funds from Paser to RedTeam

To move cash between entities, initiate a **wire** from Paser to RedTeam through **Pinnacle Bank** (contacts Scotty and Michael). Use the existing **email template** — update the amount and the date — and send it to the bankers, **copying Craig and Connor** for transparency. If you date it for the next day, the bank processes it then.

- 1 Open the Pinnacle wire email template; update the amount and date.
- 2 Send to the bankers (Scotty / Michael); copy Craig and Connor.
- 3 Date it for the day you want it to process.

The screenshot displays a computer screen with two main windows. On the left is a Microsoft Excel spreadsheet titled "Paser, Inc. AP Aging Detail Report As of Jul 21, 2020". The spreadsheet lists various transactions with columns for Date, Transaction Type, Num, Vendor display name, Due date, Past due, Amount, and Open balance. It includes sub-totals for different age ranges (e.g., 91 or more days past due, 61-90 days past due, etc.) and a grand total. On the right is a Gmail window showing an email template titled "Paser Wire Request". The email body contains a detailed description of the wire transfer, including the amount (\$195,368.00) and the date (July 22, 2020). The email is addressed to "Scotty (per se)" and "Michael (per se)" and includes "Craig Tala" and "Connor Schone" in the CC field. A video call window is visible in the bottom right corner of the screen, showing participants "Greg Coble" and "Connor Schone".

The wire-request email template used to move funds from Paser to RedTeam.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:04:46

"That gives you a sense of who I let know when I'm sending money, just so that it's transparent that I'm directing money from one bank to another."

Step 16 — Pay external vendors

Pay outside vendors from the right entity's bank portal: **Paser** through **Pinnacle Bank**, and **RedTeam** through **One Florida Bank** treasury management. Work from the AP aging report; for each bill enter the

account and ABA numbers, verify the invoice amount, confirm the payment in the portal (using the **VIP access app**), then take the **reference number** back to QuickBooks and mark the bill paid. (Examples this run: LBMC, Prestige Staffing, Process Pro, Justin.)

- 1 From AP aging, pick the bills to pay for the entity.
- 2 In the bank portal (Pinnacle for Paser / One Florida for RedTeam), enter account + ABA and verify the amount.
- 3 Confirm with the VIP access app; capture the reference number.
- 4 Mark the bill paid in QuickBooks with that reference number.

Paying an external vendor from the bank portal, then recording it in QuickBooks.

Step 17 — Fund the Wise account for contractors

Fund Wise so the contractor payments (see the **Wise guide**) can go out. In Wise, **toggle to the correct company**, and check the current balance against the entity's balance sheet. From the **contractor pay spreadsheet** (monthly pay + incentives + severance), total what's needed and **add the Wise fees**, then wire that amount in. Greg keeps last month's transfer/fee figures on the sheet as a reference for the next month.

- 1 In Wise, toggle to the entity you're funding (Paser or RedTeam).
- 2 Compare the balance to the entity balance sheet.

- 3 Total the contractor sheet (pay + incentives + severance) and add the Wise fees.
- 4 Wire that amount to fund the account.

Funding a Wise entity balance ahead of contractor payments.

FROM THE MEETING TRANSCRIPT — Greg Coble, 00:16:43

“To toggle between the two, you click on the company up here... right now it's set on Red Team, and I'm going to fund Paser... then we can see how much is in the balance.”

Include the fees. Estimate and include the Wise transaction fees in the amount you wire — the contractor spreadsheet tracks pay, incentives, and severance so the funded total matches what's needed.

The contractor pay spreadsheet (pay + incentives + severance) that sizes the funding wire.

Step 18 — Send the payment summary to Craig

Keep management in the loop. When you process an early or notable vendor payment, email Craig a short summary — the **vendor**, the **amount**, and a brief description (e.g. “marketing content”) — so he can approve without back-and-forth. At the end of the cycle, send a closing email with a **snippet of the processed ACH and wire transfers**; once Craig approves, the payment run is complete.

- 1 Email Craig a summary of each early/specific payment (vendor, amount, description).
- 2 At the end, send a snippet of the ACH/wire transfers processed.
- 3 The run is complete once Craig approves.
